## Pharmacy Fentanyl Patch 4 Patch Return Disposal Sheet

### Guidelines for Returning Fentanyl Patches

The Fentanyl Patch Return System is a program to promote safe, effective, and responsible use of Fentanyl patches.

1. Store your fentanyl patches (new and used) in a safe and secure place in your home. Keep them out of the reach of everyone, but especially of children and pets.
2. When you are ready to return your used patches, **you must follow these guidelines:**
  - a. Stick each used patch on this sheet in a numbered box. Place the patch flat, so that it is totally visible.
  - b. Tape the four corners of the patch, with a small amount of tape, so that the patch is totally visible to the pharmacy staff. You must return all of your patches in order to have your prescription refilled.
3. If the above guidelines are not followed, you will receive a maximum of one patch, and your physician will be notified that the Patch Return process has not been followed. You will not have your fentanyl prescription refilled until the above procedure is followed, and/or your family physician gives approval to the pharmacy to refill it.

By signing this form, I am acknowledging that I understand the above guidelines, and agree to follow them. I am aware that if any of the attached ***Fentanyl Patches*** are found to be **altered** or to be **counterfeit**, I could face ***Criminal Charges***.
